

EmberArresta™

Gutter Outlet & Downpipe Valve

Valve with heat shield.

Valve with heat shield.

Valve installed in downpipe (in-line).

Valve attached directly to gutter outlet.

Dual valves attached to outlets and storm-water pipes to tanks.

Valve spacer and square outlet.

Protect your precious stored water supplies from contaminates.

EmberArresta™

“Another Valuable Tool in your Fire Defence Kit”

VALVE

- Designed to be installed directly to the gutter outlet or in-line.
- Allows guttering to be filled with water to a desired level in preparation for an impending bush fire or ember attack.
- Can also be installed in-line, anywhere along a downpipe or storm-water pipe.
- Comes in two sizes; 90mm and 75mm .
- Both sizes available with or with-out heat shields.
- Easily use existing adaptors to suit irregular sized gutter outlets or downpipes.

SAFETY & FEATURES

- Can be easily and safely closed and opened by anyone and with-out the use of a ladder.
- Fill guttering early - well before the approaching threat.
- Unique sliding seal, can be locked in open position. (Made from food grade materials and lubricants).
- Easy to install to new and existing guttering, directly or with spacers and differently shaped outlets.
- UV stabilised valve body and seal - UV tested ISO 4892-2, SAE J 2527, SAE J 2412 and Solar Radiation.
- Radiant heat shields (clip on, rotate shield to face exposed side and screw clamps to secure).
- Heat shield - 2 x .8mm steel, zinc plated and powder coated in Heritage Cream.
- Protects stored water supplies. (Confines contaminates to the roof area and guttering).
- Prevent “fine fuel” ignition in gutters and help prevent embers from entering the roof space.

Be Bush Fire Ready

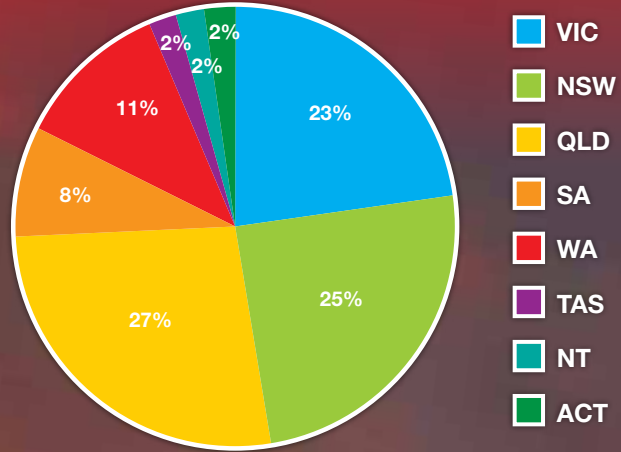

EmberArresta™ - Gutter Outlet & Downpipe Valve

Everyone and anyone living in bush fire prone areas, should have the valve installed to their gutter outlets and or downpipes to assist with the defence of their homes and property during an impending bush fire threat or ember attack.

An installed valve(s) allows the homeowner to prepare and leave early, knowing the gutters will stay full of water, or have an option to stay and defend without having to continually top-up or refill gutters with water while defending the property during adverse conditions.

Homes at Risk of Bush Fire & Ember Attack

EmberArresta™ "Another Valuable Tool in your Fire Defence Kit"

NETCO brings you another fire safety product: EmberArresta™ - Gutter Outlet & Downpipe Valve.

“

As a retiree living in Tea Tree Gully I love the trees, birds and occasional visit from koalas and kangaroos but the worry of bush fires during the hot months has had me on the roof blocking and flooding gutters two or three times a year, the new 'EmberArresta' gutter outlet makes this dangerous task simple and safe from the ground, I have recently had a hip replacement and can still protect my home from fires!

~ Jack Davis (Tea Tree Gully, SA)

”

“

The upper balcony of my home overlooks a national park, the views are lovely but the risk of fire is real! In the past I have had to climb up onto my roof more than 20 feet off the ground to block and flood my gutters, with the new 'EmberArresta' gutter outlet I can safely stay on the balcony and reach up with a broom to close the easy to use valve, much quicker and safer than climbing on the roof and the heat shield gives great piece of mind that the valve will stand up to the test.

~ Geoff Mitcham (Seacliff Park, SA)
